

TOPIC: GETTING STARTED WITH C++

1.	<p>Write a program to generate the following output:</p> <table><tr><th>GRNO</th><th>NAME</th><th>CLASS</th><th>SEC</th></tr><tr><td>4202</td><td>BISWAS KUMAR</td><td>11</td><td>C</td></tr><tr><td>5523</td><td>ZAHEER KHAN</td><td>12</td><td>A</td></tr><tr><td>6641</td><td>BINNOP CHANDY</td><td>10</td><td>D</td></tr></table>	GRNO	NAME	CLASS	SEC	4202	BISWAS KUMAR	11	C	5523	ZAHEER KHAN	12	A	6641	BINNOP CHANDY	10	D
GRNO	NAME	CLASS	SEC														
4202	BISWAS KUMAR	11	C														
5523	ZAHEER KHAN	12	A														
6641	BINNOP CHANDY	10	D														
2.	Write a program to input length(l) and breadth (b) and the area of a rectangle using the formula l x b.																
3.	Write a program to input Y and n and find Y ⁿ and √Y using built-in functions.																
4.	Write a program to input the principle amount and find the simple interest using the formula SI = P*R*T/100,where P = Principle Amount, R= Rate of interest and T= Time in years.
