## Retirement of a Partner

## LEARNING OBJECTIVES:

After studying this lesson, we are confident; you should be competent enough to:

- Identify adjustments arising due to retirement of a partner.
- Calculate new and gaining ratio.
- Make accounting treatment of goodwill in different cases.
- Make accounting treatment of the revaluation of assets and liabilities and distribution of profit or loss on revaluation among partners.
- Make accounting treatment of undistributed profit or loss.
- Determine the amount payable to retiring partner and make payment as per agreement and provisions of law.
- Make adjustment of partners' capital account

Salient Points:-

1. An existing partner may wish to withdraw from a firm for various reasons.
2. The amount due to a retiring partner will be the total of :-
a. his capital in the firm
b. His share in firm's accumulated profits and losses.
c. His share of profit or loss on revaluation of assets and liabilities
d. ;his share of profits till the date of retirement
e. His remuneration and interest on capital.
f. His share in firm's goodwill.
3. The ratio in which the continuing (remaining) partners have acquired the share from the outgoing partner is called gaining ratio.
4. Share of goodwill of outgoing partner will be debited to gaining partners in their gaining ratio.
5. At the retirement of a partner Profit \& Loss on Revaluation of Assets and liabilities and balances of accumulated Profits and losses will be distributed among all partners (including outgoing partner) in their old ratio.
6. The outstanding balance of outgoing partner's capital $\mathrm{A} / \mathrm{C}$ may be settled by fully or partly payment and (or) transferring into his loan account.

Q. $1 \quad$ What is meant by retirement of a partner?

Ans. Retirement of a partner is one of the modes of reconstituting the firm in which old partnership comes to an end and a new partner among the continuing (remaining) partners (i.e., partners other than the outgoing partner) comes into existence.
Q. 2 'How can a partner retire from the firm?

Ans. A partner may retire from the firm;
i) In accordance with the terms of agreement; or
ii) With the consent of all other partners; or
iii) Where the partnership is at will, by giving a notice in writing to all the partners of his intention to retire.
Q. 3 What do you understand by 'Gaining Ratio?

Ans. Gaining Ratio means the ratio by which the share in profit stands increased. It is computed by deducting old ratio from the new ratio.
Q. 4 What do you understand by 'Gaining Partner'?

Ans Gaining Partner is a partner whose share in profit stands increased as a result of change in partnership.
Q. 5 Give two circumstances in which gaining ratio is computed.

Ans. Gaining Ratio is computed in the following circumstances: (i) When a partner retires or dies. (ii) When there is a change in profit-sharing ratio.
Q. $6 \quad$ Why is it necessary to revalue assets and reassess liabilities at the time of retirement of a partner?

Ans. At the time of retirement or death of a partner, assets are revalued and liabilities are reassessed so that the profit or loss arising on account of such revaluation up to the

## Downloaded from www.studiestoday.com

date of retirement or death of a partner may be ascertained and adjusted in all partners' capital accounts in their old profit-sharing ratio.
Q. $7 \quad$ Why is it necessary to distribute Reserves Accumulated, Profits and Losses at the time of retirement or death of a partner?

Ans. Reserves, accumulated profits and losses existing in the books of account as on the date of retirement or death are transferred to the Capital Accounts (or Current Accounts) of all the partners (including outgoing or deceased partner) in their old profit-sharing ratio so that the due share of an outgoing partner in reserves, accumulated profits/losses gets adjusted in his Capital or Current Account.
Q. $8 \quad$ What are the adjustments required on the retirement or death of a partner?

Ans. At the time of the retirement or death of a partner, adjustments are made for the following:
(i) Adjustment in regard to goodwill.
(ii) Adjustment in regard to revaluation of assets and reassessment of liabilities.
(iii) Adjustment in regard to undistributed profits.
(iv) Adjustment in regard to the Joint Life Policy and individual policies.
Q. $9 \quad \mathrm{X}$ wants to retire from the firm. The profit on revaluation of assets on the date of retirement is Rs. 10,000. X is of the view that it be distributed among all the partners in their profit-sharing ratio whereas Y and Z are of the view that this profit be divided between Y and Z in new profit-sharing ratio. Who is correct in this case?

Ans. $\quad \mathrm{X}$ is correct because according to the Partnership Act a retiring partner is entitled to share the profit up to the date of his retirement. Since the profit on revaluation arises before a partner retires, he is entitled to the profit.
Q. 10 How is goodwill adjusted in the books of a firm -when a partner retires from partnership?

Ans. When a partner retires (or dies), his share of profit is taken over by the remaining partners. The remaining partners then compensate the retiring or deceased partner in the

## Downloaded from www.studiestoday.com

form of goodwill in their gaining ratio. The following entry is recorded for this purpose:

Remaining Partners' Capital A/cs ...Dr.
[Gaining Ratio]

To Retiring/Deceased Partner's Capital A/c [With his share of goodwill]

If goodwill (or Premium) account already appears in the old Balance Sheet, it should be written off by recording the following entry:

All Partners' Capital/Current A/cs ...Dr. [Old Ratio]
To Goodwill (or Premium) A/c
Q. $11 \quad \mathrm{X}, \mathrm{Y}$ and Z are partners sharing profits and losses in the ratio of $3: 2: 1 . \mathrm{Z}$ retires and the following Journal entry is passed in respect of Goodwill:
Y's Capital A/c ...Dr.

To X's Capital A/c

To Z's Capital A/c
10,000
Q. 21 The value of goodwill is Rs. 60,000. What is the new profit-sharing ratio between X and Y ?

Ans. Without calculating the gaining ratio, the amount to be adjusted in respect of goodwill can be calculated directly with the help of following statement:

## STATEMENT SHOWING THE REQUIRED ADJUSTMENT FOR GOODWILL

| Particulars | X(Rs.) | V(Rs.) | Z(Rs.) |
| :--- | :---: | :---: | ---: |
| Right of goodwill before retirement (3:2:1) | 30,000 | 20,000 | 10,000 |
| (Old Ratio) Right of goodwill after retirement | 20,000 | 40,000 | - |
| (Balancing Figure) (New Ratio) |  |  |  |

Net Adjustment
(-) 10,000 (+) 20,000
(-) 10,000

The new ratio between X and Y is $1: 2$.

## Downloaded from www.studiestoday.com

Q. 13 State the ratio in which profit or loss on revaluation will be shared by the partners when a partner retires. ;

Ans. Profit or loss on revaluation of assets/liabilities will be shared by the partners (including the retiring partner) hi their old profit-sharing ratio.
Q. 14 How is the account of retiring partner settled?

Ans. The retiring partner account is settled either by making payment in cash or by promising the retiring partner to pay in installments along with interest or by making payment partly in call and partly transferring to his loan account. The -following Journal entry is passed:

> Retiring Partner's Capital A/c ...Dr.
> To Cash* [If paid in cash] Or

To Retiring Partner's Loan [If transferred to loan]

## DEATH OF A PARTNER

## Learning Objectives:

After studying this Unit, students will be able to understand and prepare:
a) Deceased partners capital account
b) Deceased partners Executor account
c) Executors loan account
d) Calculation of share of profit and Goodwill of the deceased partner.

## SALIENT POINTS:

* Gaining Ratio: When the partner retires or dies, his share of profit is taken over by the remaining partners.
* Gaining ratio is applied for the purpose of calculating Goodwill to be paid off to the deceased partner.
* The deceased partner s share of profit till the date of death will be calculated by preparing Profit and Loss Suspense account on the date of Death.

## SHORT QUESTIONS--- (3-4 MKS)

1. $A, B$ and $C$ are partners sharing profits and losses in the ratio of $5: 4: 1$. The profit for the year ending 31, March, 2010 was Rs 1, 00,000. B died on $30^{\text {th }}$ June 2010. Calculate C's share of profit till the date of death and pass necessary journal entry.
