

## **UNIT 5- OUR ENVIRONMENT**

### **LIVING THINGS**

1. Living things need food, water and air to live.
2. They grow with time.
3. They give birth to young ones ex. animals, plants, Human beings etc.

Pictures of living things

We can move from one place to another all animals can move from one place to another, because they are living, But can plants move from one place to another?

Generally plants do not move from one place to another though. They show movement in some ways.

Have you seen Sunflower bending towards the light?

### **NON LIVING THINGS**

1. Non living things do not need any thing to live.
2. They do not grow in size.
3. They do not give birth to young one.

Ex. Table, Chair, Bag, Fan

Q. Classify the following into living and non living things.
