Date: \_\_\_\_\_ Name: \_\_\_\_\_ Roll No: \_\_\_\_\_

**Observation**

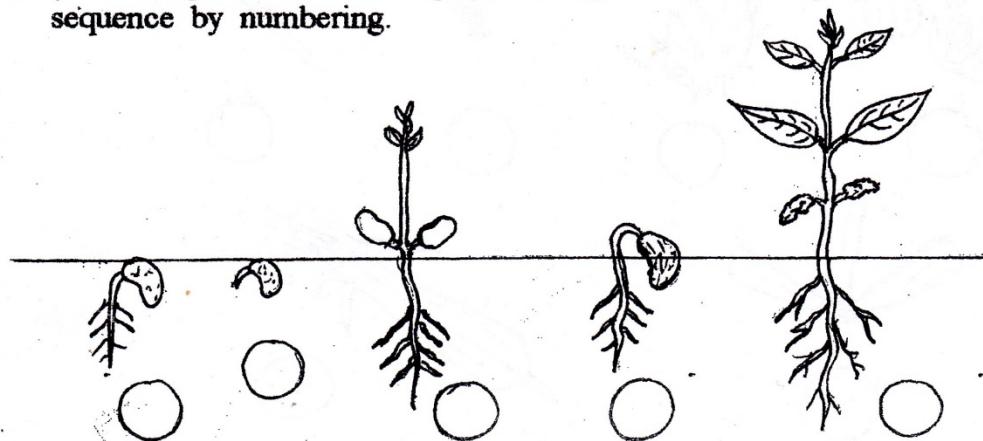

**Q.1.** Given on the left is the picture of some chanas soaked in water in a bowl. On the right is an empty bowl. Draw how the bowl would look like after the chanas have been left to soak for 7-8 hours.

**Q.2.** Given below is a picture of a sprouted chana. One of the thread like structure coming out of the chana develops into root while the other develops into shoot (stem). Write in the spaces provided the name of the parts.

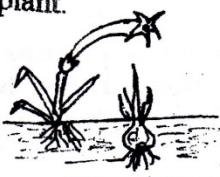

**Q.3).** Seeds grow into a new plant. Arrange them into a proper sequence by numbering.

Q4 Observe the picture and name the part of the plant that grows into a new plant.

BRYOPHYLLUM

LILY

ROSE

Identification

Q5. Do you know? Seeds are great travelers. How do the following seeds reach different places. Write **(W)** if they are carried by water, **(A)** if they are carried by animals, **(B)** if they are carried by air and **(S)** if they are thrown by splitting.
