## Topic :- How many Squares? <br> Worksheet 4

Date: $\qquad$
Month: $\qquad$

Competency-Understanding Basic Concepts

1. Here is a rectangle of area $8 \mathrm{sq} . \mathrm{cm}$.

a) Draw 2 straight lines in this rectangle to divide it into 1 rectangle and 2 equal triangles. Find the area of the new rectangle and the area of 1 of the triangles.
2. Rearrange the squares in the rectangle to form another rectangle whose perimeter is 18 cm .
