

THE AIR FORCE SCHOOL**CLASS V SCIENCE H.W. WORKSHEET****DATE OF SUBMISSION: 11th April 2014****Q1. Fill in the blanks using the words given in the word box.**

Oxygen	carbon dioxide	sap	photosynthesis	water
food	sunlight	chlorophyll	stem	starch

Leaves help to make for a plant. They contain a green substance called chlorophyll. The leaves take in a gas called The roots take in and other substances are dissolved into it from the ground. The changes the water and carbon dioxide into the food that the plant needs. This food is a kind of sugar called Some foods we eat such as rice and potatoes also contain starch.

But this food can only be made if the plant gets plenty of The inside the plant carries all the food around the plant to keep it healthy and to make it grow. Sap is the oozy liquid you can see when you break the open.

This whole process of making food is called While this is happening, the leaves give off a gas called
