# WORK SHEET <br> SUBJECT- Science <br> Chapter-6: Time, Motion and Speed 

## A. Answer in not more than 20 words.

1. What is a unit of measurement?
2. How are stopwatches different from ordinary watches?
3. What property of a pendulum made it suitable to $b$ used in the manufacture of clocks?
4. What is the time period of a pendulum?
5. What is oscillation?
6. When a body is said to be in uniform motion?
7. Correct the following.
(a) 100 m .
(b) 50 kgs
(c) 20 secs
(d) 80 kilos

## B. Numericals

1. A car takes 20 minutes to cover a distance of 15 km . calculate its speed in $\mathrm{km} / \mathrm{hr}$ and $\mathrm{m} / \mathrm{s}$.
2. Plot s distance-time graph foe a body travelling at s speed of $1.5 \mathrm{~m} / \mathrm{s}$.
3. The distance between two towns is 600 km . how much time it would take to cover this distance at an average speed of $40 \mathrm{~km} / \mathrm{hr}$.
4. A man driving at an average speed of $45 \mathrm{~km} / \mathrm{hr}$ takes 7 hours to travel from one town to another. What is the distance between the towns?
