## SENIOR SECTION <br> DEPARTMENT OF MATHEMATICS <br> CLASS IX <br> WORKSHEET NO- 8 <br> QUADRILATERALS

## SECTION A: (1 MARK)

1. In a Trapezium PQRS Find $x$ and $y$

$$
\angle \mathrm{P}=2 x+10, \angle \mathrm{Q}=92^{\circ}, \angle \mathrm{R}=x+20, \angle \mathrm{~S}=y
$$

$$
\begin{aligned}
& \left(x=50^{\circ},\right. \\
& \left.y=88^{\circ}\right)
\end{aligned}
$$

2. In quadrilateral $A B C D$ and $A E F G$ are parallelograms and $\angle \mathrm{C}=58^{\circ}$ find $\angle \mathrm{F}$.

3. In quadrilateral $\mathrm{ABCD}, \angle \mathrm{A}=70^{\circ}, \angle \mathrm{B}=130^{\circ}$, bisectors of $\angle \mathrm{C}$ and $\angle \mathrm{D}$
meet at O . Find $\angle \mathrm{COD}$.

## SECTION B: (2 MARKS)

4. $A B C D$ is $\|^{m}, A P$ is the bisector of $\angle A$ meeting $B C$ at $P$ and $P$ is the mid- point of $B C$ then prove that $A D=2 X C D$
5. In a given figure $A B C D$ is a $\|^{m}$. Find $2 \angle A B C-\angle A D C$.

6. In $\triangle A B C, \mathrm{AB}=\mathrm{AC}, \mathrm{CD}=\mathrm{AB}$ and AD is the bisector of $\angle \mathrm{PAC}$ Prove that ABCD is a $\mathrm{II}^{\mathrm{m}}$

7. In a quadrilateral ABCD , the angles $\angle \mathrm{A}, \angle \mathrm{B}$ and $\angle \mathrm{C}$ are in the ratio 2:3:1 and $\angle \mathrm{D}=60^{\circ}$
find other angles.

## SECTION C: (3 MARKS)

8. In the given figure, PQRS is a $\|^{m} \mathrm{PO}$ and QO are the bisectors of $\angle \mathrm{P}$ and $\angle Q$ respectively. Then prove that $\angle Q O P=90^{\circ} \quad$ (HOTS)

9. Diagonals of quadrilateral $\operatorname{ABCD}$ bisect each other. If $\angle \mathrm{A}=35^{\circ}$ then find $\angle \mathrm{B}$ (NCERT EXEMPLAR)

## Downloaded from www.studiestoday.com

10. $B D$ is one of the diagonal of a quadrilateral $A B C D$. $A M$ and $C N$ are perpendiculars from $A$ and $C$ respectively on $B D$. Show that $\operatorname{ar}(\square \quad A B C D)=\frac{1}{2} B D(A M+C N)$.
11. ABCD is a $I^{m} \mathrm{P} \& \mathrm{Q}$ are mid -points of $\mathrm{BC} \& \mathrm{CD}$ respectively Show that $C R=\frac{1}{4} A C$

## SECTION D: (4 MARKS)

12. Show that four triangles formed by joining the mid points of the three sides of a triangle are congruent to each other.
13. In the figure $A B C D$ is a Rhombus $A B$ is extended to points $F$ and $E$ such that $A F=A B=B E$. $F D$ and $E C$ are extended to meet at $G$.
Show that $\angle \mathrm{FGE}$ is a right angle

14. $P, Q, R$ and $S$ are respectively the mid -points of the sides of $A B, B C, C D$ and $A D$ of a quadrilateral $A B C D$ such that $A C$ is perpendicular to $B D$. Prove that PQRS is a rectangle.
(NCERT EXEMPLAR)
15. A diagonal of a parallelogram bisects one of its angles. Show that it is a rhombus.
(NCERT EXEMPLAR)
