## THE INDIAN HEIGHTS SCHOOL <br> CLASS -IX <br> SUBJECT- SCIENCE <br> REVISION WORKSHEET

1. State Newton's Law of Gravitation. Why is it called Universal?
$\qquad$
$\qquad$
$\qquad$
2. A ball when thrown vertically upwards reaches a maximum height of 19.6 m . Find the velocity with which this ball was thrown to reach this height and the time taken by it.
$\qquad$
$\qquad$
$\qquad$
3. Differentiate between Mass and Weight.
$\qquad$
$\qquad$
$\qquad$
4. Why is it preferable to adopt preventive measures and biological control methods for the protection of crops?
$\qquad$
$\qquad$
$\qquad$
5. Compare the use of manure and fertilizers in maintaining the fertility of the soil.
$\qquad$
$\qquad$
$\qquad$
6. What are the desirable characters present in bees that make them suitable for honey production?
$\qquad$
$\qquad$
$\qquad$
7. Why do we get hurt on jumping on a hard surface as compared to jumping on a soft surface like a muddy floor?
$\qquad$
$\qquad$
$\qquad$
8. A 5 Kg rifle fires a 10 gm bullet at a velocity of $250 \mathrm{~m} / \mathrm{sec}$. What would be the recoil velocity of the rifle?
$\qquad$
$\qquad$
$\qquad$
